

Summer Classics COM Program

Summer Classics is pleased to announce the continuation of the COM (Customer's Own Material) Program. In addition to all stocked fabrics, we will produce cushions in fabrics to match any existing materials you already have in your home or patio. All COM fabrics must be provided to Summer Classics at your expense. All cushions made with your fabric will be valued in the B category. Customers will be responsible for fabrics until they are received by Summer Classics personnel at the cushion factory. At that point we will begin to produce the cushions. All lead times quoted for deliveries will begin after receipt of the fabric. We will also require that you call Customer Service prior to placing your order to confirm style of cut and run of the design on the furniture. For example, vertical stripes or horizontal stripes and repeat lengths of prints. The following is a list of cushion SKU's and the required length of material needed to make the appropriate cushion. Yardage may vary if certain repeat patterns are desired. All yardage listed below is based on 52" inch wide roles. Be sure to include the order number on the COM yardage sent to Summer Classics. **Listed below is approximate yardage**, any repeats over 25" (inches) please contact Summer Classics Customer Service Department.
